N.C.C. Civic League Resolution # 11-11-02

Adopted - **November 15, 2011**

Regarding the proposed Delaware River Basin Commission (DRBC) regulations for hydraulic fracturing in the Delaware River Valley

WHEREAS, the Delaware River Basin Commission's proposed fracking regulations utilized by oil and gas industries are unacceptable because of the absence of sufficient controls over the chemistry of liquid and gaseous injectants and because of the absence of appropriate controls to prevent the escape of natural gas into the water table

NOW, THEREFORE, BE IT RESOLVED THAT THE CIVIC LEAGUE FOR NEW CASTLE COUNTY stands in opposition to the proposed Delaware River Basin Commission's authorization of hydraulic fracturing in the Delaware River Valley until appropriate regulations and oversight are required and guarantees are established to protect the water quality of the basin from unforeseen contamination by the industry.

Chuck Mulholland, President
Civic League for New Castle County
